

## Civey Survey

# Consumer stance towards new biotechnological methods in plant breeding

Berlin, 17th January 2023

The online survey institute [Civey](#) has collected data between July 26, 2021 and March 31, 2022 (question 1) or has been collecting data continuously since July 26, 2021 (question 2) on behalf of the associations of the German agricultural, horticultural and food industries. This is intended to provide a representative impression of the attitudes of German consumers to new biotechnological processes, which also include the new genomic techniques such as the gene scissors CRISPR/Cas (genome editing).

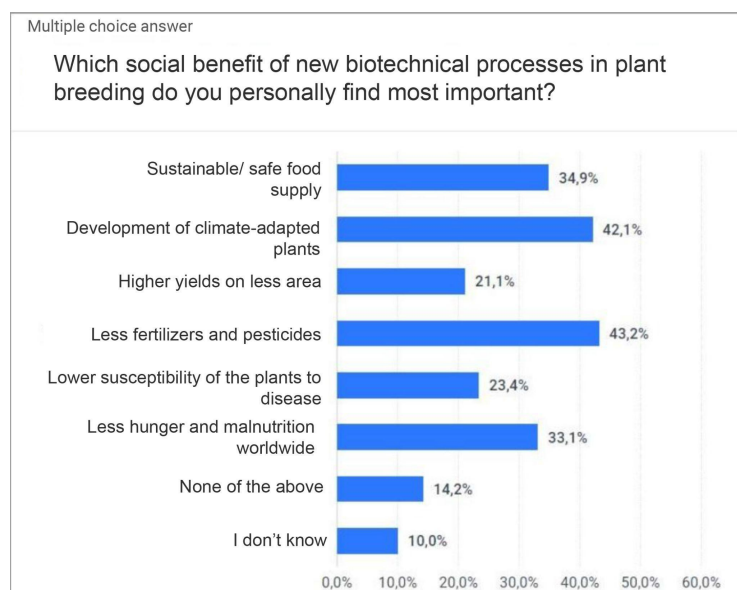

### Question 1

Survey period: 26.07.2021 - 31.03.2022  
Number of all participants: 15,362  
Sample size: 2,502  
Statistical error: 3.4%

### Question 2

Survey period: since 26.07.2021  
Number of all participants: 23,408  
Sample size: 2,502  
Statistical error: 3.5%
